

# ANNUAL REPORT 2015 / 2016

#### westerninvestmentclub.ca

Our Mission: To build interest in capital markets among young investors at Western University and teach the fundamentals of investing.

## FUND MANAGER'S STATEMENT

ear fellow members, we are excited to update you on WIC's 2015-2016 year through this annual report. In 1996, a group of Western students who were passionate about investing started this fund with just \$25,000. After 20 years, we are now managing a fund with over \$170,000 in assets under management.

Since May 1st, 2015, WIC's fund has depreciated 5.8%. A combination of declining consumer confidence, dropping oil prices and tightening pharmaceutical industry regulations has contributed to our fund's depreciation. However, we have still performed well relative to the major indexes. The S&P 500 and the S&P/TSX Composite have declined by 2.0% and 9.1%, respectively.

Aside from the fund itself, our club has continued to grow thanks to all your support. This year, our club has grown to ~600 members, making us the club with one of the largest presence at Western University. The most important aspect of WIC is educating our members. We are pleased with the development of investment knowledge shown in the club through our weekly training seminars and stock pitches. We hope the club continues to strive to create a strong community of bright, young investors at Western.

We hope members returning to Western in the next academic year to continue to be involved with WIC. For members who are graduating in 2016, we wish you have a successful career in whatever you choose to do. Going forward, we are confident that the club has built a solid foundation and optimistic that the fund will continue its strong performance. We would like to thank the analyst team for their hard work this past year, researchers for their dedication, and Western's endowment for their continued support. We look forward to many years of continued success.

Sincerely,

Steve Yang & Jamie Cruickshank Fund Managers, 2015 / 2016

Steve Yang Fund Manage

Jamie Cruickshank

This annual report is dedicated to all the former members and alumni of the Western Investment Club. Without your hard work WIC would not be possible.

#### **OUR ORGANIZATION**

ur fund was officially created in 1996 with the generous donation of \$25,000 from Mr. Cameron S. Marshman, in honour of his wife. Since then, we have managed it with a value investing philosophy. Mr. Marshman's wish was to educate and foster the next generation of investors in the University of Western Ontario by giving them a chance to invest real capital. Today, that donation has grown by almost 600%.

#### **FUND STRATEGY**

WIC employs a bottom-up fundamental investing approach to every investment. Each idea begins with a screening process to find stocks that are trading at below its intrinsic value. Our analysts then conduct an extensive research procedure to understand and evaluate the company. The process can sometimes take months for a single idea. WIC attempts to truly understand a company's valuation as well as the key drivers of its future growth potential before executing a trade. We believe that by conducting an exhaustive company research process, we eliminate the risk of unforeseen downside risks.

For over 20 years, WIC has applied a disciplined approach to portfolio construction. Since all of our investments are high conviction ideas, we do not use beta diversification in our portfolio. However, we try to allocate capital evenly across our groups to find the best ideas among each industry. Lastly, each of our investments has a minimum of 30% margin of safety to limit downside.

## PORTFOLIO AT-A-GLANCE

At the start of the year, our main goal was to decrease our cash position with further investments, as well as re-balance the portfolio. As such, WIC's portfolio has changed dramatically in the fiscal year. Our main changes were within the TMT and IND groups. TMT's portfolio has changed significantly with the additions of Avigilon, QAD and Syntel, while IBM and Microsoft were both sold. IND has expanded with the additions of Astronics and Bristow Group, while Chemtura was sold. In total, we conducted 12 buys and 6 sells this year.

WIC's portfolio is comprised of U.S. equities, Canadian equities, and a cash yield component. We face foreign exchange risks in the CAD / USD rate since much of our capital is invested in U.S. equities. Our cash is invested in a liquid savings account when it is not deployed for investments.

## FUND PERFORMANCE

#### **COMMENTARY:**

During our fiscal period, the U.S. S&P index posted a decline of 2.0% due to continued macro-economic concerns and turbulence in the markets. The Canadian S&P / TSX further lagged U.S. returns and decreased by 9.1%. During this time, WIC's portfolio outperformed the S&P / TSX but fell just short of the S&P, declining 5.8%.

2016 was a difficult year for investors due to a number of headwinds, including falling oil prices and significant geo-political uncertainty. The decline in our portfolio was primarily driven by falling prices across sectors that were most impacted by the various issues, with our pharmaceutical and natural resources positions hardest hit. That being said, much of our portfolio was able to weather the turbulent markets and helped to mitigate declines in the affected sectors. Overall, we feel that WIC's strategy has been well executed this year. Since inception, the fund has returned 582.4%.

## SELECT INVESTMENTS

#### TransCanada (TSE:TRP):

WIC purchased TransCanada in the fall of 2015 for \$43.58 on the thesis that the market was putting undue focus on the uncertainty surrounding the Keystone XL pipeline project, resulting in a depressed stock price. We held further conviction in the strength and limited downside inherent in the rest of the business. To-date, we have a 20% unrealized gain on TransCanada and expect the investment to continue to perform well.

#### Seaworld Entertainment (NYSE:SEAS):

WIC purchased SeaWorld in March 2016 at the price of \$28.11, with the belief that recent negative press on the company from media such as the documentary "Blackfish" had pushed the stock down below its intrinsic value. We saw an opportunity for a long-term value play as the company's fundamentals had not been impacted as much as the market seemed to perceive. To-date, we have an unrealized loss of 11%, but continue to have conviction in the long-term value of the business.

#### Amsurg (NASDAQ:AMSG):

WIC purchased AmSurg in October 2014 at the price of \$61.87. We had a strong belief in the company's continued pursuit of accretive M&A in the fragmented market in which they were operating, with increasing healthcare spending to help further drive top-line growth. Over the past year, the company experienced a significant increase in stock value, and we believed that our thesis had been realized. Thus, we liquidated our position with a return of over 90%.

#### Wal-Mart (NYSE:WMT):

WIC purchased Wal-Mart many years ago at the price of \$38.11 as a stable, long-term value play with limited downside. Over the years, the stock had grown significantly to represent slightly under 10% of WIC's total assets, and as such we decided to re-evalute our position. We sold the stock on the belief that the comapny had limited further upside, and that our capital could be better deployed elsewhere. With this trade, we locked in a gain of over 180%.
